Where do pandas live?

More games

Perfect Animal Habitat

V

Correct!

The Giant Panda is an omnivore native to south-central China and a member of the bear family of animals. It lives in a habitat of temperate forest. Bamboo leaves, stems, and shoots are the primary diet of the giant panda, but it also feeds on meat from birds and small rodents. In a day it eats at least 28 pounds of bamboo in order to satisfy its diet.
