

Chess game (6-8 years)

Instructions

Show the Gambia presentation

Divide the class into two teams

Decide which team is blue knight and which one is yellow knight

Explain that they can only move the knight in an L-shape.

Use the question cards to ask the questions

Students must write the correct option on the white boards and only then can they move the knight.

If a student doesn't answer the right question, they miss the option to move their knight.

The chess board will be in powerpoint format and it will have some Gambian flags and whichever team captures the most flag wins the game.

You need:

Markers

Questions cards

White boards
